<i>Thibault Steeve</i>	<i>Super Ligue</i>	<i>05-sept-07</i>	<i>3-4</i>
<i>Trudel Yves</i>	<i>Francs Rigolos</i>	<i>23-nov-07</i>	<i>19-20</i>

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 13.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase in the number of people employed in the public sector. One reason is that the public sector has become a more important part of the economy. Another reason is that the public sector has become a more attractive place to work. A third reason is that the public sector has become a more important part of society.

The public sector has become a more important part of the economy because it provides a number of essential services. These services include health care, education, and social care. The public sector also provides a number of other services, such as housing and transport. These services are essential for the well-being of the population.

The public sector has become a more attractive place to work because it offers a number of benefits. These benefits include a secure job, a good pension, and a good work-life balance. The public sector also offers a number of other benefits, such as a good salary and a good working environment. These benefits make the public sector a more attractive place to work than the private sector.

The public sector has become a more important part of society because it provides a number of essential services. These services include health care, education, and social care. The public sector also provides a number of other services, such as housing and transport. These services are essential for the well-being of the population.

The public sector has become a more important part of society because it provides a number of essential services. These services include health care, education, and social care. The public sector also provides a number of other services, such as housing and transport. These services are essential for the well-being of the population.

The public sector has become a more important part of society because it provides a number of essential services. These services include health care, education, and social care. The public sector also provides a number of other services, such as housing and transport. These services are essential for the well-being of the population.

The public sector has become a more important part of society because it provides a number of essential services. These services include health care, education, and social care. The public sector also provides a number of other services, such as housing and transport. These services are essential for the well-being of the population.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in the health sector has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

Another reason for the increase in the number of people employed in the health sector is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

A third reason for the increase in the number of people employed in the health sector is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

A fourth reason for the increase in the number of people employed in the health sector is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

A fifth reason for the increase in the number of people employed in the health sector is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

A sixth reason for the increase in the number of people employed in the health sector is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

A seventh reason for the increase in the number of people employed in the health sector is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

A eighth reason for the increase in the number of people employed in the health sector is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a major employer in the UK. Another reason is that the public sector has become a major employer in the health care sector. A third reason is that the public sector has become a major employer in the education sector. A fourth reason is that the public sector has become a major employer in the social care sector.

The increase in the number of people employed in the public sector has led to a number of challenges for the public sector. One challenge is that the public sector has become a major employer in the health care sector, and this has led to a number of challenges for the health care sector. Another challenge is that the public sector has become a major employer in the education sector, and this has led to a number of challenges for the education sector. A third challenge is that the public sector has become a major employer in the social care sector, and this has led to a number of challenges for the social care sector.

One of the challenges for the health care sector is that the public sector has become a major employer in the health care sector, and this has led to a number of challenges for the health care sector. Another challenge is that the public sector has become a major employer in the education sector, and this has led to a number of challenges for the education sector. A third challenge is that the public sector has become a major employer in the social care sector, and this has led to a number of challenges for the social care sector.

One of the challenges for the education sector is that the public sector has become a major employer in the education sector, and this has led to a number of challenges for the education sector. Another challenge is that the public sector has become a major employer in the social care sector, and this has led to a number of challenges for the social care sector. A third challenge is that the public sector has become a major employer in the health care sector, and this has led to a number of challenges for the health care sector.

One of the challenges for the social care sector is that the public sector has become a major employer in the social care sector, and this has led to a number of challenges for the social care sector. Another challenge is that the public sector has become a major employer in the health care sector, and this has led to a number of challenges for the health care sector. A third challenge is that the public sector has become a major employer in the education sector, and this has led to a number of challenges for the education sector.

One of the challenges for the health care sector is that the public sector has become a major employer in the health care sector, and this has led to a number of challenges for the health care sector. Another challenge is that the public sector has become a major employer in the education sector, and this has led to a number of challenges for the education sector. A third challenge is that the public sector has become a major employer in the social care sector, and this has led to a number of challenges for the social care sector.

One of the challenges for the education sector is that the public sector has become a major employer in the education sector, and this has led to a number of challenges for the education sector. Another challenge is that the public sector has become a major employer in the social care sector, and this has led to a number of challenges for the social care sector. A third challenge is that the public sector has become a major employer in the health care sector, and this has led to a number of challenges for the health care sector.

One of the challenges for the social care sector is that the public sector has become a major employer in the social care sector, and this has led to a number of challenges for the social care sector. Another challenge is that the public sector has become a major employer in the health care sector, and this has led to a number of challenges for the health care sector. A third challenge is that the public sector has become a major employer in the education sector, and this has led to a number of challenges for the education sector.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health care services, and this has led to an increase in the number of people who are employed in health care.

Another reason for the increase in the number of people employed in health care is the increasing demand for health care services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health care services, and this has led to an increase in the number of people who are employed in health care.

A third reason for the increase in the number of people employed in health care is the increasing demand for health care services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health care services, and this has led to an increase in the number of people who are employed in health care.

A fourth reason for the increase in the number of people employed in health care is the increasing demand for health care services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health care services, and this has led to an increase in the number of people who are employed in health care.

A fifth reason for the increase in the number of people employed in health care is the increasing demand for health care services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health care services, and this has led to an increase in the number of people who are employed in health care.

A sixth reason for the increase in the number of people employed in health care is the increasing demand for health care services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health care services, and this has led to an increase in the number of people who are employed in health care.

A seventh reason for the increase in the number of people employed in health care is the increasing demand for health care services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health care services, and this has led to an increase in the number of people who are employed in health care.

the 1990s, the number of people in the UK who are aged 65 or over has risen from 10.5 million to 12.5 million (19.5% of the population) (ONS 2004).

There are a number of reasons why the number of people aged 65 or over has risen. The main reason is that people are living longer. The life expectancy at birth in the UK is 77.5 years for men and 81.5 years for women (ONS 2004).

There are also a number of other reasons why the number of people aged 65 or over has risen. One reason is that people are having children later in life. Another reason is that people are getting married later in life. A third reason is that people are getting divorced later in life.

There are a number of reasons why people are living longer. One reason is that people are eating healthier. Another reason is that people are exercising more. A third reason is that people are taking better care of themselves.

There are a number of reasons why people are having children later in life. One reason is that people are working longer hours. Another reason is that people are getting married later in life. A third reason is that people are getting divorced later in life.

There are a number of reasons why people are getting married later in life. One reason is that people are working longer hours. Another reason is that people are getting divorced later in life. A third reason is that people are getting married later in life.

There are a number of reasons why people are getting divorced later in life. One reason is that people are working longer hours. Another reason is that people are getting married later in life. A third reason is that people are getting divorced later in life.

There are a number of reasons why people are eating healthier. One reason is that people are working longer hours. Another reason is that people are exercising more. A third reason is that people are taking better care of themselves.

There are a number of reasons why people are exercising more. One reason is that people are working longer hours. Another reason is that people are getting married later in life. A third reason is that people are getting divorced later in life.

There are a number of reasons why people are taking better care of themselves. One reason is that people are working longer hours. Another reason is that people are getting married later in life. A third reason is that people are getting divorced later in life.

There are a number of reasons why people are working longer hours. One reason is that people are getting married later in life. Another reason is that people are getting divorced later in life. A third reason is that people are working longer hours.

There are a number of reasons why people are getting married later in life. One reason is that people are working longer hours. Another reason is that people are getting divorced later in life. A third reason is that people are getting married later in life.

There are a number of reasons why people are getting divorced later in life. One reason is that people are working longer hours. Another reason is that people are getting married later in life. A third reason is that people are getting divorced later in life.

There are a number of reasons why people are working longer hours. One reason is that people are getting married later in life. Another reason is that people are getting divorced later in life. A third reason is that people are working longer hours.

There are a number of reasons why people are getting married later in life. One reason is that people are working longer hours. Another reason is that people are getting divorced later in life. A third reason is that people are getting married later in life.

There are a number of reasons why people are getting divorced later in life. One reason is that people are working longer hours. Another reason is that people are getting married later in life. A third reason is that people are getting divorced later in life.

There are a number of reasons why people are working longer hours. One reason is that people are getting married later in life. Another reason is that people are getting divorced later in life. A third reason is that people are working longer hours.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 1.5 million to 2.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions such as heart disease, diabetes, and asthma. This has led to an increase in the number of people who need to be treated in hospitals and other health care settings.

Another reason for the increase is the expansion of the public sector. The government has invested heavily in health care over the past few decades, and this has led to the creation of new jobs in the public sector. This includes jobs in hospitals, community health centres, and other health care settings.

There are also a number of other factors that have contributed to the increase in the number of people employed in the public sector. These include the increasing number of people who are employed in the public sector as a result of the expansion of the public sector, and the increasing number of people who are employed in the public sector as a result of the increasing demand for health care services.

The increase in the number of people employed in the public sector has had a number of implications for the health care system. One of the main implications is the increasing cost of health care. The government has had to invest more money in health care over the past few decades, and this has led to an increase in the cost of health care services.

Another implication is the increasing pressure on health care workers. The number of people who are employed in the public sector has increased, but the number of people who are employed in the public sector as a result of the expansion of the public sector has not increased proportionately. This has led to a shortage of health care workers, and this has had a negative impact on the quality of health care services.

There are a number of ways in which the health care system can be improved. One of the main ways is to increase the number of people who are employed in the public sector. This can be done by expanding the public sector, and by increasing the number of people who are employed in the public sector as a result of the expansion of the public sector.

Another way to improve the health care system is to increase the efficiency of health care services. This can be done by reducing the number of people who are employed in the public sector, and by increasing the number of people who are employed in the public sector as a result of the expansion of the public sector.

There are a number of other ways in which the health care system can be improved. These include increasing the number of people who are employed in the public sector, and increasing the number of people who are employed in the public sector as a result of the expansion of the public sector.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are employed in the public sector who are working in health care services.

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are employed in the public sector who are working in health care services.

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are employed in the public sector who are working in health care services.

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are employed in the public sector who are working in health care services.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions such as diabetes, heart disease, and cancer. This has led to an increase in the number of people who need to be treated in hospitals and other health care settings.

Another reason for the increase in the number of people employed in the public sector is the increasing number of people who are employed in the public sector who are employed in health care. This is due to the increasing demand for health care services, and the increasing number of people who are employed in the public sector who are employed in health care.

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions such as diabetes, heart disease, and cancer. This has led to an increase in the number of people who need to be treated in hospitals and other health care settings.

Another reason for the increase in the number of people employed in the public sector is the increasing number of people who are employed in the public sector who are employed in health care. This is due to the increasing demand for health care services, and the increasing number of people who are employed in the public sector who are employed in health care.

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions such as diabetes, heart disease, and cancer. This has led to an increase in the number of people who need to be treated in hospitals and other health care settings.

Another reason for the increase in the number of people employed in the public sector is the increasing number of people who are employed in the public sector who are employed in health care. This is due to the increasing demand for health care services, and the increasing number of people who are employed in the public sector who are employed in health care.

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions such as diabetes, heart disease, and cancer. This has led to an increase in the number of people who need to be treated in hospitals and other health care settings.

Another reason for the increase in the number of people employed in the public sector is the increasing number of people who are employed in the public sector who are employed in health care. This is due to the increasing demand for health care services, and the increasing number of people who are employed in the public sector who are employed in health care.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a more important part of the economy. Another reason is that the public sector has become a more attractive place to work. A third reason is that the public sector has become a more important part of the welfare state.

The increase in the number of people employed in the public sector has led to a number of changes in the way that the public sector is organized. One change is that the public sector has become more decentralized. Another change is that the public sector has become more market-oriented.
